About **Lubaga Hospital**

The story of Lubaga Hospital started on 18th october 1899 when six missionary sistersof our lady of Africa arrived at Lubaga hill where they were given a plot of land by kabaka Daudi Chwa.

Begining as an open air dispensary in the first few months, the facility grew to a twenty bed Hospital by 1900, and with the grace of God this journey of growth has since taken leaps and bounds to-date.

Being the second oldest Hospital in the country, we take pride in having taken care of the healh care needs of Ugandans for the last 125 years, through times of war, epidemics, natural disasters and now covid-19 pandemic.

Presently, the lubaga Hospital is a 300 bed-capacity referral/tertiary facility unit offering a full range of specialised, super - specialized and transplant services, and with the vision of being “a state -of-the-art health care facility in Africa”.

Archbishop Cyprian Lwanga Kizito Specialist Centre
